

MSA DAMPER

THE TAILOR MADE DAMPERS

MSA DAMPER SRL was founded in 2019 by a Group of Industrial Investors which acquired the 25 years now-how and technology of Mediterr Shock Absorbers S.p.A.

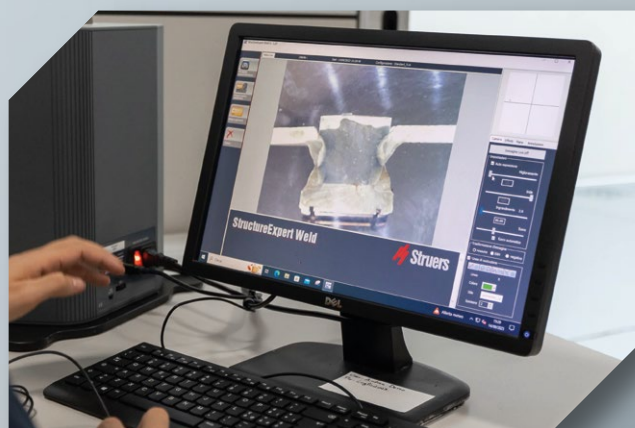

The headquarters have been maintained in Asti in a complete high tech, new and functional plant, to which many of the latest-generation production systems were added and technologies always aiming to meet our market and customer's targets.

We are specialists in designing and producing shock absorbers and anti-vibration metal rubber components addressing the market to railway, commercial and special purpose vehicles.

MSA DAMPER is present on an international level supplying both leading OEMs and aftermarket through its distribution network.

A complete range of standard and special shock absorbers for buses, trucks, trailer-axles, agricultural and special purpose vehicle applications are manufactured in conformity with the severe technical specifications of our partners.

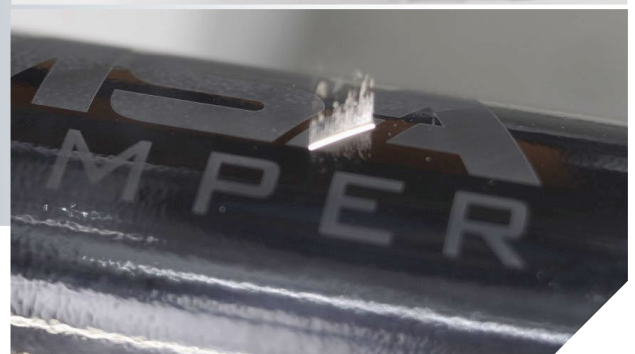

MSA DAMPER has obtained the international certifications:
ISO 9001:2015, ISO/TS 22163:2017 (IRIS rev 03),
EN 3834-2:2021, EN 15085-2:2020,
ISO 14001:2015, ISO 45001:2018.

The aftermarket products are certified as original parts
and equal to those and can be mounted to replace the OE
components.

We can customise our products with Laser marking, and
offer the best technology to ensure the readability and
permanence of codes/names/brands.
The laser can mark as small as 0.5 x 0.5 mm, and can
customize the shock absorbers according to the
customer's requests and we can also customize the boxes.
